General Assistance

General Assistance statistics provided in the Bulletin cover municipalities with population in excess of 20,000 and all county and district administration boards. Together, they account for about 86 percent of the total caseload in Ontario.

The caseload in March 1981 was 73,892 or 7.5 percent higher than in March 1980. More specifically, the unemployable singles showed the largest change, with males increasing by 17.3 percent and females by 12.9 percent. The family units showed moderate increases, ranging from 2.9 percent for female-headed family units to 5.8 percent for male-headed family units. However, the employable category reported a 12.0 percent increase for male-headed family units, negligible increase (0.3 percent) for female-headed family units, a 2.6 percent decline for single females and a moderate increase (4.7 percent) for single males.

Twelve-month cumulative expenditures ending March 1981 amounted to \$201.3 million or 19.2 percent more than the previous twelve months ending March 1980.

The breakdown by the Ministry's four regional offices showed a substantial increase (14.2 percent) in quarterly averages of beneficiaries for the Southwestern Region and a small increase (2.1 percent) for the Southeastern Region. The Northern Region, on the other hand, reported a moderate decline (6.7 percent), while the Central Region showed a negligible drop (0.5 percent). The expenditures increased in all four regions, the largest (28.3 percent) being in the Southwestern Region and the lowest (8.5 percent) in the Northern Region.

Supplementary Aid showed increases in quarterly averages of beneficiaries in three regions, the highest (11.4 percent) being in the Northern Region and the lowest (2.9 percent) in the Southwestern Region. The Central Region, which is the largest, reported a 7.7 percent decline in beneficiaries, thus contributing to an overall decrease in quarterly averages of 1.1 percent. Total expenditures, however, increased by 2.8 percent.

Special Assistance program also reported increases in quarterly averages of beneficiaries in three regions, the largest (13.8 percent) being in the Southwestern Region and the lowest (5.6 percent) in the Central Region. The overall increase in beneficiaries was 7.9 percent and in the expenditures 2.4 percent.

In relation to the population in Ontario, General Assistance beneficiaries constituted an average 1.7 percent in March 1981. This ranged from a low of 0.5 percent in York, Halton and Perth to a high of 3.9 percent in Prescott and Russell. In the largest administrative units, the percentages were 1.8 in Toronto, 2.2 in Ottawa-Carleton, 2.3 in Hamilton-Wentworth and 0.7 in Peel.

Family Benefits

Family benefits data cover the same municipal units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in March 1981 was 117,708 or 2.3 percent higher than in March of the previous year. More specifically, with the exception of foster children, which declined by 5.4 percent, there was a general increase among recipients without the Guaranteed Annual Income System (GAINS). The largest increases were reported for handicapped children (27.2 percent) and for family units without children (20.0 percent). Families with children, which account for 44 percent of total caseload, showed a 1.9 percent increase. Recipients under GAINS showed an overall decline, the largest being among couples (10.5 percent) and families with children (9.1 percent).

Twelve-months cumulative expenditures ending March 1981 amounted to \$441.2 million or 13.2 percent more than the previous 12 months ending March 1980.

The provincial average of beneficiaries as a percentage of the total population in Ontario was 2.6 percent in March 1981. This ranged from a low of 1.0 percent in Peel, Perth and Halton to a high of 6.9 percent in Manitoulin and 6.7 percent in Nipissing (excluding North Bay). In the largest administrative units, Toronto at 2.4 percent and Ottawa-Carleton at 2.3 percent, were slightly below the provincial average. Hamilton-Wentworth at 3.9 percent, was well above and Peel at 1.0 percent, was far below the provincial average.

The combination of Family Benefits and General Assistance as a percentage of the population in Ontario refers only to the 54 largest units covered in the General Assistance section. In March 1981, the overall average was 4.3 percent, ranging from a low of 1.5 percent in Perth and Halton to a high of 10.2 percent in Nipissing (excluding North Bay) and 9.0 percent in Kingston.

Child Welfare

In March 1981, the children in care numbered 13,131 or 7.1 percent less than in March of the previous year. More specifically, children in group homes decreased by 16.7 percent and those in other locations by 15.4 percent. Children in foster homes and paid institutions declined by 5.7 and 4.9 percent respectively.

Distribution of children by age and wardship showed a declining trend for virtually all ages. The most noticeable decrease was reported by non-wards, ranging from a low of 7.3 percent for children below 7 years of age to a high of 21.0 percent for those between 13 and 17 years of age. Society wards showed an 18.0 percent decline for children below 7 years of age and 7.7 percent for children between 13 and 17 years of age. Crown wards, on the other hand, reported a moderate decline (4.1 percent) for children in the 13 to 17 age group, a negligible increase (0.7 percent) for children between 7 and 12 years of age and a 7.7 percent drop for children below 7 years of age.

A breakdown of the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. The Northern Region, at 0.6 percent, was above the provincial average, the Central Region was at the provincial average; and two other regions, at 0.3 percent, were slightly below.

When protection and other community services were included, the beneficiaries as a percentage of total population ranged from a low of 0.4 percent in Kawartha-Haliburton, York and Peel to a high of 3.6 percent in Kenora and 2.1 percent in Kapuskasing. The overall average was 0.9 percent. The largest centres, Toronto and Hamilton (both with two societies combined) as well as Ottawa-Carleton--all were slightly above the provincial average, while Peel was far below.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act covers people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (35) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance data provided in the Bulletin cover municipalities with population in excess of 20,000 and all county and district administration boards. Together, they account for about 86 percent of the total caseload in Ontario.

The caseload in June 1981 was 63,815 or 1.5 percent higher than in June 1980. In the employable category, the largest increase (6.9 percent) was reported for female-headed family units to be followed by a moderate increase (2.4 percent) for male-headed family units. In the unemployable category, however, male singles showed a 6.5 percent increase and female singles 5.0 percent; while female-headed family units reported a 5.6 percent decline.

Twelve-months cumulative expenditures ending June 1981 amounted to \$210.6 million or 18.9 percent more than the previous twelve months ending June 1980.

The breakdown by the Ministry's four regional offices showed a noticeable increase (10.3 percent) in quarterly averages of beneficiaries for the Southwestern Region and a negligible rise (0.6 percent) for the Southeastern Region. The other two regions, however, reported a decline of slightly more than five percent. The expenditures increased in all four regions, the largest (21.8 percent) being in the Southwestern Region and the smallest (4.7 percent) in the Central Region.

Supplementary Aid showed an overall decline of 0.9 percent in quarterly averages of beneficiaries. More specifically, the South-eastern and Central Regions reported decreases of 5.5 and 0.4 percent respectively, while Northern Region showed a 1.7 percent increase and Southwestern Region 0.5 percent. Total expenditures increased by 11.2 percent.

Under the Special Assistance program, quarterly averages of beneficiaries declined in the Northern (14.2 percent) and Central (5.2 percent) Regions; while showing increases in the Southwestern (5.9 percent) and Southeastern (3.9 percent) Regions. A noticeable decrease in the Central Region contributed to an overall decline in beneficiaries of 1.7 percent. Total expenditures, however, increased by 7.7 percent.

In relation to the population in Ontario, General Assistance beneficiaries constituted an average 1.4 percent in June 1981. This ranged from a low of 0.4 percent in Halton, Perth, York, Rainy River and Middlesex to a high of 3.3 percent in Prescott and Russell and 3.0 percent in Windsor. In the largest administrative units, the percentages were 1.5 in Toronto, 2.1 in Ottawa-Carleton, 2.2 in Hamilton-Wentworth and 0.5 in Peel.

Family Benefits

Family Benefits statistics cover the same municipal units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in June 1981 was 119,060 or 4.1 percent higher than in June of the previous year. More specifically, there was a general decline among recipients covered by the Guaranteed Annual Income System (GAINS) the largest being among couples (11.9 percent) and families with children (9.3 percent). The category without GAINS showed increases of 25.7 percent among couples, 21.4 percent among handicapped and 12.6 percent among singles. However, foster parents showed a 5.6 percent decline.

Twelve-months cumulative expenditures ending June 1981 amounted to \$452.9 million or 13.6 percent more than the previous 12 months ending June 1980.

The overall average of beneficiaries as a percentage of the total population in Ontario was 2.7 percent in June 1981. This ranged from a low of 1.0 percent in Peel, Perth and Halton to a high of 6.8 percent in Manitoulin and 6.6 percent in Nipissing (excluding North Bay). In the largest administrative units, Toronto at 2.5 percent and Ottawa-Carleton at 2.3 percent, were slightly below the provincial average; while Hamilton-Wentworth, at 3.9 percent, was well above and Peel at 1.0 percent, was far below the provincial average.

The combination of Family Benefits and General Assistance beneficiaries as a percentage of total population in Ontario refers only to the 54 largest units covered in the General Assistance section. In June 1981, the overall average was 4.3 percent, ranging from a low of 1.4 percent in Perth and Halton to a high of 9.7 percent in Nipissing (excluding North Bay) and 8.8 percent in Kingston.

Child Welfare

In June 1981, the children in care numbered 12,930 or 6.5 percent less than in June 1980. More specifically, children on adoption probation declined by 12.5 percent and those in other locations -- by 13.1 percent. However, children in foster homes and paid institutions decreased by 3.8 and 2.6 percent respectively.

Distribution of children by age and wardship showed a general decline for virtually all age groups. The largest decrease was reported by society wards, ranging from a low of 8.8 percent for children between 7 and 12 years of age to a high of 15.1 percent for those below 7 years of age. Crown wards showed an 11.0 percent decline for children below 6 years of age and a drop of 2.1 for those between 7 and 12 years of age. Non-wards, on the other hand, reported decreases of 2.2 percent for children between 7 and 12 years of age, 7.4 percent for those below 7 and 10.8 percent for children in 13 to 17 age group.

A breakdown of the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. The Northern Region, at 0.5 percent, was slightly above the provincial average, the Central Region was at the provincial average; and two other regions, at 0.3 percent, were slightly below.

When protection and other community services were included, the beneficiaries as a percentage of total population ranged from a low of 0.4 percent in York and Peel to a high of 3.5 percent in Kenora. The overall average was 0.9 percent. The largest centres, Toronto and Hamilton (both with two societies combined) as well as Ottawa-Carleton - all were slightly above the provincial average, while Peel was far below.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act covers people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (35) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance statistics provided in the Bulletin cover municipalities with population in excess of 20,000 and all county and district administration boards. Together, they account for about 86 percent of the total caseload in Ontario.

The caseload in September 1981 was 61,840 or 2.5 percent lower than in September 1980. In the employable category, the largest decline (13.8 percent) was among female-headed family units, followed by a moderate decrease (2.4 percent) among male-headed family units and 3.3 percent increase among female singles. In the employable category, however, female-headed family units showed a 9.4 percent increase and female singles - a 3.6 percent decline.

Twelve-months cumulative expenditures ending September 1981 amounted to \$212.4 million or 14.3 percent more than the previous twelve months ending September 1980.

The breakdown by the Ministry's four regional offices showed declines in quarterly averages of beneficiaries in three regions, the highest (10.6 percent) being in the Central Region. The Southwestern Region reported a 2.2 percent increase. The expenditures, however, increased in three regions, with the largest (9.2 percent) increase in the Southwestern Region. The Central Region showed a 1.7 percent decline.

Supplementary Aid showed an overall decline of 6.8 percent in quarterly averages of beneficiaries. More specifically, the Central and Southwestern Regions reported a ten percent decrease, while the Northern and Southeastern Regions showed the increases of 12.1 and 7.8 percent respectively. Total expenditures increased by 3.3 percent.

Under the Special Assistance program, quarterly averages of beneficiaries declined in three regions, the largest (10.6 percent) being in the Central Region and the smallest (3.7 percent) in the Southwestern Region. The Southeastern Region, however, reported a 7.0 percent increase, thereby alleviating an overall decline to 6.4 percent. Total expenditures increased by 6.8 percent.

In relation to the population in Ontario, General Assistance beneficiaries constituted an average 1.4 percent in September 1981. This ranged from a low of 0.4 percent in York, Rainy River, Middlesex and Halton to a high of 3.0 percent in Prescott and Russell and Windsor.

Family Benefits

Family Benefits data cover the same municipal units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in September 1981 was 119,876 or 4.1 percent higher than in September of the previous year. More specifically, there was a general decline among recipients covered by the Guaranteed Annual Income System (GAINS), the largest being among couples (10.0 percent) and families with children (9.9 percent). The category without GAINS showed a substantial increase among couples (24.3 percent) and handicapped (16.6 percent), followed by a 12.2 percent increase among singles. However, foster parents showed a 5.6 percent decline.

Twelve-months cumulative expenditures ending September 1981 amounted to \$464.7 million or 13.9 percent more than the previous 12 months ending September 1980.

The overall average of beneficiaries as a percentage of the total population in Ontario was 2.7 percent in September 1981. This ranged from a low of 1.0 percent in Peel, Perth and Halton to a high of 6.8 percent in Manitoulin and 6.7 percent in Nipissing (excluding North Bay). In the largest administrative units, Toronto at 2.5 percent and Ottawa-Carleton at 2.3 percent, were slightly below the provincial average, while Hamilton-Wentworth, at 3.9 percent, was well above and Peel, at 1.0 percent, was far below the provincial average.

The combination of Family Benefits and General Assistance beneficiaries as a percentage of total population in Ontario refers only to the 54 largest units covered in the General Assistance section. In September 1981, the overall average was 4.1 percent, ranging from a low of 1.4 percent in Perth and Halton to a high of 9.8 percent in Nipissing (excluding North Bay) and 8.4 percent in Kingston.

Child Welfare

In September 1981, the children in care numbered 12,406 or 7.7 percent less than in September 1980. More specifically, the largest declines were reported among children in group homes (20.7 percent), adoption probation homes (14.0 percent) and other locations (13.7 percent).

Distribution of children by age and wardship showed a general decline in all wards and all age groups. The largest decrease was reported by society wards, ranging from 13.0 percent for children between 7 and 12 years of age to 15.2 percent for those between 13 and 17 years of age. The smallest decrease (1.0 percent) was reported by crown wards for children in the 7 to 12 age group.

A breakdown of the 50 societies showed an average 0.3 percent of children in care of the assessed population under the age of 19. The Northern and Central Regions, at 0.5 and 0.4 percent respectively, were slightly above the provincial average; and two other regions, at 0.3 percent, were at the provincial average.

When protection and other community services were included, the beneficiaries as a percentage of total population ranged from a low of 0.4 percent in York, Durham and Peel to a high of 3.3 percent in Kenora and 2.2 percent in Kapuskasing. The overall average was 0.8 percent. The largest centres, Toronto and Hamilton (both with two societies combined) and Ottawa-Carleton, all at 0.1 percent, were slightly above the provincial average, while Peel, at 0.4 percent, was far below.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act covers people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (35) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance statistics provided in the Bulletin cover municipalities with population in excess of 20,000 and all county and district administration boards. Together, they account for about 86 percent of the total caseload in Ontario.

The caseload in September 1981 was 61,840 or 2.5 percent lower than in September 1980. In the employable category, the largest decline (13.8 percent) was among female-headed family units, followed by a moderate decrease (2.4 percent) among male-headed family units and 3.3 percent increase among female singles. In the employable category, however, female-headed family units showed a 9.4 percent increase and female singles - a 3.6 percent decline.

Twelve-months cumulative expenditures ending September 1981 amounted to \$212.4 million or 14.3 percent more than the previous twelve months ending September 1980.

The breakdown by the Ministry's four regional offices showed declines in quarterly averages of beneficiaries in three regions, the highest (10.6 percent) being in the Central Region. The Southwestern Region reported a 2.2 percent increase. The expenditures, however, increased in three regions, with the largest (9.2 percent) increase in the Southwestern Region. The Central Region showed a 1.7 percent decline.

Supplementary Aid showed an overall decline of 6.8 percent in quarterly averages of beneficiaries. More specifically, the Central and Southwestern Regions reported a ten percent decrease, while the Northern and Southeastern Regions showed the increases of 12.1 and 7.8 percent respectively. Total expenditures increased by 3.3 percent.

Under the Special Assistance program, quarterly averages of beneficiaries declined in three regions, the largest (10.6 percent) being in the Central Region and the smallest (3.7 percent) in the Southwestern Region. The Southeastern Region, however, reported a 7.0 percent increase, thereby alleviating an overall decline to 6.4 percent. Total expenditures increased by 6.8 percent.

In relation to the population in Ontario, General Assistance beneficiaries constituted an average 1.4 percent in September 1981. This ranged from a low of 0.4 percent in York, Rainy River, Middlesex and Halton to a high of 3.0 percent in Prescott and Russell and Windsor.

Family Benefits

Family Benefits data cover the same municipal units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in September 1981 was 119,876 or 4.1 percent higher than in September of the previous year. More specifically, there was a general decline among recipients covered by the Guaranteed Annual Income System (GAINS), the largest being among couples (10.0 percent) and families with children (9.9 percent). The category without GAINS showed a substantial increase among couples (24.3 percent) and handicapped (16.6 percent), followed by a 12.2 percent increase among singles. However, foster parents showed a 5.6 percent decline.

Twelve-months cumulative expenditures ending September 1981 amounted to \$464.7 million or 13.9 percent more than the previous 12 months ending September 1980.

The overall average of beneficiaries as a percentage of the total population in Ontario was 2.7 percent in September 1981. This ranged from a low of 1.0 percent in Peel, Perth and Halton to a high of 6.8 percent in Manitoulin and 6.7 percent in Nipissing (excluding North Bay). In the largest administrative units, Toronto at 2.5 percent and Ottawa-Carleton at 2.3 percent, were slightly below the provincial average, while Hamilton-Wentworth, at 3.9 percent, was well above and Peel, at 1.0 percent, was far below the provincial average.

The combination of Family Benefits and General Assistance beneficiaries as a percentage of total population in Ontario refers only to the 54 largest units covered in the General Assistance section. In September 1981, the overall average was 4.1 percent, ranging from a low of 1.4 percent in Perth and Halton to a high of 9.8 percent in Nipissing (excluding North Bay) and 8.4 percent in Kingston.

Child Welfare

In September 1981, the children in care numbered 12,406 or 7.7 percent less than in September 1980. More specifically, the largest declines were reported among children in group homes (20.7 percent), adoption probation homes (14.0 percent) and other locations (13.7 percent).

Distribution of children by age and wardship showed a general decline in all wards and all age groups. The largest decrease was reported by society wards, ranging from 13.0 percent for children between 7 and 12 years of age to 15.2 percent for those between 13 and 17 years of age. The smallest decrease (1.0 percent) was reported by crown wards for children in the 7 to 12 age group.

A breakdown of the 50 societies showed an average 0.3 percent of children in care of the assessed population under the age of 19. The Northern and Central Regions, at 0.5 and 0.4 percent respectively, were slightly above the provincial average; and two other regions, at 0.3 percent, were at the provincial average.

When protection and other community services were included, the beneficiaries as a percentage of total population ranged from a low of 0.4 percent in York, Durham and Peel to a high of 3.3 percent in Kenora and 2.2 percent in Kapuskasing. The overall average was 0.8 percent. The largest centres, Toronto and Hamilton (both with two societies combined) and Ottawa-Carleton, all at 0.1 percent, were slightly above the provincial average, while Peel, at 0.4 percent, was far below.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act covers people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (35) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance statistics provided in the Bulletin cover municipalities with population in excess of 20,000 and all county and district administration boards. Together, they account for about 86 percent of the total caseload in Ontario.

The caseload in December 1981 was 72,704 or 7.8 percent higher than in December 1980. In the employable category, the largest increases were among family units, ranging from 46.2 percent for female to 22.6 percent for male-headed units. Among singles, males showed 18.0 percent and females 9.6 percent rise. In the unemployable category, the increases among singles were about four percent, while the family units showed an 11.7 percent decline for female-headed family units and a 3.4 percent increase for male-headed units.

Twelve-months cumulative expenditures ending December 1981 amounted to \$217.2 million or 13.2 percent more than the previous twelve months ending December 1980.

The breakdown by the Ministry's four regional offices showed increases in quarterly averages of beneficiaries in three regions, the highest (12.0 percent) being in the Southwestern Region and the lowest (0.5 percent) in the Southeastern Region. The Central Region reported a 4.5 percent decline. The expenditures, however, increased in all four regions, ranging from an 8.8 percent in the Central Region to 27.7 percent in the Southwestern Region.

Supplementary Aid showed an overall decline of 28.8 percent in quarterly averages of beneficiaries. The largest decrease (40.0 percent) was reported by the Southwestern Region and the lowest (4.6 percent) by the Northern Region. Total expenditures, however, showed a negligible (0.9 percent) increase.

Quarterly averages of beneficiaries under the Special Assistance program showed an overall decline of 11.1 percent. However, the breakdown by region showed a wide variation of trends. For example, the Northern Region reported a slight (0.5 percent) decline, while the Central Region showed a substantial drop (19.8 percent) in beneficiaries. The Southeastern Region, on the other hand, showed a noticeable (13.7 percent) increase, while the Southwestern Region reported only 1.0 percent rise. Total expenditures declined by 2.8 percent.

In relation to the population in Ontario, General Assistance beneficiaries constituted an average 1.7 percent in December 1981. This ranged from the low of 0.5 percent in Halton to a high of 3.7 percent in Prescott and Russell.

Family Benefits

Family Benefits data cover the same units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in December 1981 was 119,127 or 2.3 percent higher than in December 1980. More specifically, there was a substantial decline among recipients covered by the Guaranteed Annual Income System (GAINS), the largest being among couples (36.0 percent) and families with children (27.4 percent). The category without GAINS showed a substantial increase - 46.0 percent among couples and 23.9 percent among singles.

Twelve-months cumulative expenditures ending December 1981 amounted to \$489.4 million or 16.6 percent more than the previous 12 months ending December 1980.

The overall average of beneficiaries as a percentage of population in Ontario was 2.6 percent in December 1981. This ranged from a low of 1.0 percent in Peel, Perth and Halton to a high of 6.6 percent in Nipissing (excluding North Bay). In the largest administrative units, Toronto at 2.5 percent and Ottawa-Carleton at 2.3 percent were slightly below the provincial average, while Hamilton-Wentworth, at 3.8 percent, was well above.

The combination of Family Benefits and General Assistance beneficiaries as a percentage of total population in Ontario refers only to the 54 largest units covered in the General Assistance section. In December 1981, the overall average of beneficiaries was 4.3 percent, ranging from a low of 1.4 percent in Halton to a high of 10.4 percent in Nipissing (excluding North Bay).

Child Welfare

In December 1981, the children in care numbered 12,072 or 7.4 percent less than in December 1980. More specifically, the largest declines were reported among children in group homes (20.3 percent), adoption probation homes (15.8 percent) and other locations (9.3 percent). Foster children, which accounted for 56.2 percent of total children in care, showed a 4.5 percent decrease.

Distribution of children by wardship and age showed a general decline in virtually all wards and all age groups. The largest decrease was reported by society wards, ranging from 6.7 percent for children below 7 years of age to 15.3 percent for those between 7 and 12 years old. Crown wards reported a 12.6 percent decline for children below 7 years of age and only 1.8 percent drop for 7 to 12 years old. Non-wards showed negligible changes for children above 6 years of age but a noticeable decrease (14.0 percent) for those 6 years and younger.

A breakdown of the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. The Northern Region, at 0.6 percent, was slightly above the provincial average; the Southeastern and Southwestern Regions, at 0.3 percent, were slightly below and the Central Region, at 0.4 percent, was at the provincial average.

When protection and other community services were included, the beneficiaries as a percentage of total population ranged from a low of 0.4 percent in York, Durham and Peel to a high of 3.2 percent in Kenora and 2.1 percent in Kapuskasing. The overall average was 0.8 percent. The largest centres, Toronto and Hamilton (both with two societies combined), at 1.0 percent, were slightly above the provincial average; Ottawa-Carleton, at 0.9 percent, was at the provincial average; and Peel, at 0.4 percent, was far below.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act covers people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one , the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic. It should be noted that Metro Toronto has also Jewish Family and Child Services. This is included in the CAS statistics.

In the final table (35) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

TABLE 27. CHILD WELFARE CASES, DEC. 1980 - DEC. 1981

General Assistance

General Assistance data provided in the Bulletin cover municipalities with population in excess of 20,000 and all county and district administration boards. Together, they account for about 86 percent of the total caseload in Ontario.

The caseload in March 1982 was 81,013 or 9.6 percent higher than in March 1981. More specifically, the unemployable category reported the largest increases ranging from 105.6 percent for female to 19.8 percent for male headed family units. In the unemployable category, there was a substantial decline (23.6) among female headed family units, followed by a moderate increase (2.4 and 5.7 percent) among male headed family units and singles.

Twelve-months cumulative expenditures ending March 1982 amounted to \$228.2 million or 13.4 percent more than the previous twelve months ending March 1981.

The breakdown by the Ministry's four regional offices showed increases in quarterly averages of beneficiaries in all regions ranging from 12.7 percent in the Southwestern Region to 3.7 percent in the Central Region. The overall increase in beneficiaries was 8.3 percent. The expenditures, however, showed much higher increases in all regions, the largest (25.6 percent) being in the Southwestern Region and the lowest (13.1 percent) - in the Central Region. Total expenditures increased by 19.3 percent.

Supplementary Aid showed an overall decline of 80.9 percent in quarterly averages of beneficiaries. The Southwestern Region reported a 87.5 percent decrease, while the Northern Region showed a 44.2 percent decline. Total expenditures decreased by 45.7 percent.

Quarterly averages of beneficiaries under the Special Assistance program showed an overall decline of 57.7 percent. However, the breakdown by region showed a wide variation of trends, ranging from a 6.2 percent decrease in the Northern Region to a 74.8 percent drop in the Central Region. Total expenditures declined by 22.1 percent.

In relation to the population in Ontario, General Assistance beneficiaries constituted an average 1.8 percent in March 1982. This ranged from a low of 0.5 percent in Halton to a high of 4.1 percent in Prescott and Russell.

Family Benefits

Family Benefits data cover the same units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in March 1982 was 120,061 or 2.0 percent higher than in March 1981. More specifically, there was a substantial decline among recipients covered by the Guaranteed Annual Income System (GAINS), the largest being among couples (35.5 percent) and families with children (27.6 percent). However, the category without GAINS showed the increases of 40.9 percent among couples and 22.2 percent among singles.

Twelve-months cumulative expenditures ending March 1982 amounted to \$506.9 million or 14.9 percent more than the previous 12 months ending March 1981.

The overall average of beneficiaries as a percentage of population in Ontario was 2.6 percent in March 1982. This ranged from a low of 1.0 percent in Halton and Peel to a high of 6.7 percent in Nipissing (excluding North Bay). In the largest administrative units, Toronto, at 2.4 percent and Ottawa-Carleton, at 2.3 percent, were slightly below the provincial average, while Hamilton-Wentworth, at 3.8 percent, was well above.

The combination of Family Benefits and General Assistance beneficiaries as a percentage of population in Ontario refers only to the 54 largest units covered in the General Assistance section. In March 1982, the overall average was 4.5 percent, ranging from a low of 1.5 percent in Halton to a high of 10.5 percent in Nipissing (excluding North Bay).

Child Welfare

In March 1982, the children in care numbered 12,234 or 6.8 percent less than in March 1981. Children under protection and prevention services declined by 4.9 percent, while children under supervised adoption probation decreased by 15.3 percent.

Distribution of children by wardship showed declines of a 14.7 percent in society wards and a 5.0 percent in crown wards, while non-wards reported a 3.5 percent increase.

A breakdown of the 51 societies showed an average 0.5 percent of children in care of the estimated population under the age of 18. The Northern Region, at 0.8 percent, was above the provincial average; the Southwestern Region, at 0.4 percent, was slightly below and the Central and Southwestern Regions, at 0.5 percent, were at the provincial average.

When protection and other community services were included, the beneficiaries as a percentage of total estimated population ranged from a low of 0.2 percent in Durham and York to a high of 2.5 percent in Kenora. The overall average was 0.6 percent.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act covers people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

NOTES:

The Child Welfare Act is administered by the 51 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts, with an exception of Cochrane where two Societies - the Kapuskasing C.A.S. and the Porcupine C.A.S. serve the District. The other exceptions are Essex, Hamilton and Toronto. The first two have second Societies which are Catholic, while in Toronto there is also the Jewish Family and Child Services.

Starting with the January-March 1982 Bulletin, Child Welfare data are extracted from the reports provided by the C.A.S. Quarterly Reporting System (Q.R.S.) and the Adoption Log. They replaced C.A.S. Monthly Statistical Report (M.S.R.) in a somewhat revamped form, yet providing a good basis for comparison of trends.

At present, only six tables are provided in this Bulletin. They reflect the format and content of the previously published data in Tables 27, 29, 31, 33, 34 and 35. Replacements for tables 28, 30 and 32 are not yet available, but will be included in the Bulletin in the future.

All tables are subject to later corrections and adjustments, and should be read as approximations which give general indications of volumes and trends. It should be noted that data in Table 27 have been updated, providing more accurate totals than those published in previous issues.

TABLE 27. CHILD WELFARE CASES, MARCH 1981 - MARCH 1982

General Assistance

General Assistance data provided in the Bulletin cover municipalities with population in excess of 20,000 and all county and district administration boards. Together, they account for about 86 percent of the total caseload in Ontario.

The caseload in June 1982 was 75,637 or 18.5 percent higher than in June 1981. More specifically, the employable category reported the largest increases, ranging from 32.6 percent for single females to 109.5 percent for female headed family units. In the unemployable category, there was a substantial decline (26.6 percent) among female headed family units and a moderate increase (4.6 to 8.1 percent) among other groups.

Twelve-months cumulative expenditures ending June 1982 amounted to \$241.9 million or 16.8 percent more than the previous twelve months ending June 1981.

The breakdown by the Ministry's four regional offices showed increases in quarterly averages of beneficiaries in all regions, ranging from 11.6 percent in the Southeastern Region to 20.4 percent in the Northern Region. The overall increase in beneficiaries was 15.1 percent. The expenditures, however, showed much higher increases in all regions, the largest (28.4 percent) being in the Southwestern Region and the lowest (20.1 percent) in the Southeastern Region. Total expenditures increased by 25.5 percent.

Supplementary Aid showed an overall decline of 75.4 percent in quarterly averages of beneficiaries. The largest decrease (81.9 percent) was in the Southwestern Region and the lowest (40.8 percent) in the Northern Region. Total expenditures declined by 35.2 percent.

Quarterly averages of beneficiaries under the Special Assistance program showed an overall decline of 39.1 percent. However, the averages of decreases by region varied widely, ranging from a low of 0.5 percent in the Northern Region to a high of 48.0 percent in the Central Region. Total expenditures declined by 19.6 percent.

In relation to the population in Ontario, General Assistance beneficiaries constituted an average 1.7 percent in June 1982. This ranged from a low of 0.5 percent in Halton, Perth, York, Rainy River and Middlesex to a high of 3.8 percent in Windsor and 3.4 percent in Prescott and Russell.

Family Benefits

Family Benefits data cover the same units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in June 1982 was 122,365 or 2.8 percent higher than in June 1981. More specifically, there was a noticeable decline among recipients covered by the Guaranteed Annual Income System (GAINS), the largest being among couples (22.5 percent) and family with children (10.5 percent). However, the category without GAINS showed a noticeable increase - 25.5 percent for couples and 8.4 percent for singles.

Twelve-months cumulative expenditures ending June 1982 amounted to \$526.2 million or 16.2 percent more than the previous 12 months ending June 1981.

The overall average of beneficiaries as a percentage of population in Ontario was 2.7 percent in June 1982. This ranged from a low of 1.0 percent in Halton, Peel and York - to a high of 6.9 percent in Nipissing (excluding North Bay) and 6.5 percent in Manitoulin. In the largest administrative units, Toronto, at 2.5 percent and Ottawa-Carleton, at 2.3 percent, were slightly below the provincial average, while Hamilton-Wentworth, at 3.8 percent, was well above.

The combination of Family Benefits and General Welfare Assistance beneficiaries as a percentage of population in Ontario refers only to the 54 largest units covered in the General Assistance Section. In June 1982, the overall average was 4.3 percent, ranging from a low of 1.5 percent in Halton and York to a high of 9.1 percent in Kingston and 8.7 percent in Cornwall.

Child Welfare

In June 1982, the children in care numbered 12,083 or 6.6 percent less than in June 1981. Children under protection and prevention services declined by 3.3 percent, while children under supervised adoption probation decreased by 14.1 percent.

Distribution of children by wardship showed declines of 13.7 percent in society wards, 5.4 percent in crown wards and 1.9 percent in non-wards.

A breakdown for the 51 societies showed an average 0.5 percent of children in care of the estimated population under the age of 18. The Northern Region, at 0.8 percent, was above the provincial average; the Southwestern Region, at 0.4 percent, was slightly below, and the Central and Southeastern Regions, both at 0.5 percent, were at the provincial average.

When protection and other community services were included, the beneficiaries as a percentage of total estimated population ranged from a low of 0.2 percent in York to a high of 2.5 percent in Kenora. The overall average was 0.6 percent.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act, General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act covers people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

NOTES:

The Child Welfare Act is administered by the 51 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts, with an exception of Cochrane where two Societies - the Kapuskasing C.A.S. and the Porcupine C.A.S. serve the District. The other exceptions are Essex, Hamilton and Toronto. The first two have second Societies which are Catholic, while in Toronto there is also the Jewish Family and Child Services.

Starting with the January-March 1982 Bulletin, Child Welfare data are extracted from the reports provided by the C.A.S. Quarterly Reporting System (Q.R.S.) and the Adoption Log. They replaced C.A.S. Monthly Statistical Report (M.S.R.) in a somewhat revamped form, yet providing a good basis for comparison of trends.

At present, only six tables are provided in this Bulletin. They reflect the format and content of the previously published data in Tables 27, 29, 31, 33, 34 and 35. Replacements for tables 28, 30 and 32 are not yet available, but will be included in the Bulletin in the future.

All tables are subject to later corrections and adjustments, and should be read as approximations which give general indications of volumes and trends. It should be noted that data in Table 27 have been updated, providing more accurate totals than those published in previous issues.

SOURCE: Total children in care, protection and prevention and supervised adoptions - from the CAS Quarterly Reporting System (Q.R.S.); Estimated population-from Municipal Directory, Ministry of Inter-governmental Affairs adjusted for Indian Bands and Unorganized Territories.

* Method for calculating population distributions for:

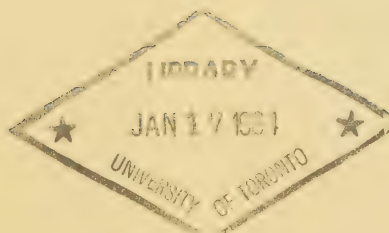

- a) Essex and Hamilton - Wentworth - regular CAS = 60%
- Catholic CAS = 40%

- b) Metro Toronto - regular CAS = 54%
- Catholic CAS = 42%
- Jewish F. & C.S. = 4%

- c) Cochrane - Kapuskasing CAS = 42.3%
- Porcupine CAS = 57.7%

General Assistance

General Assistance data provided in the Bulletin cover municipalities in excess of 20,000 and all county and district administration boards. Together, they account for about 86 percent of the total caseload in Ontario.

The caseload in September 1982 was 80,202 or 29.7 percent higher than in September 1981. More specifically, the employable category reported the largest increases, ranging from 57.9 percent for single females to 129.6 percent for female headed family units. In the unemployable category, there was a substantial decline (24.7 percent) among female headed family units and a moderate increase (5.0 to 11.3 percent) among other groups.

Twelve-months cumulative expenditures ending September 1982 amounted to \$260.4 million or 24.5 percent more than the previous twelve months ending September 1981.

The breakdown by the Ministry's four regional offices showed increases in quarterly averages of beneficiaries in all regions, ranging from 16.8 percent in the Southeastern Region to 26.6 percent in the Northern Region. The overall increase in beneficiaries was 23.8 percent. The expenditures, however, showed much higher increases in all regions, ranging from 28.5 percent in the Northern Region to 41.0 percent in the Central Region. Total quarterly expenditures increased by 37.6 percent.

Supplementary Aid showed an overall decline of 75.9 percent in quarterly averages of beneficiaries. The largest decrease (82.1 percent) was in the Southwestern Region and the lowest (36.8 percent) in the Northern Region. Total quarterly expenditures declined by 31.5 percent.

Quarterly averages of beneficiaries under the Special Assistance program showed an overall decline of 41.1 percent. However, the decreases on a regional basis varied widely, ranging from a low of 3.5 percent in the Northern Region to a high of 51.8 percent in the Central Region. Total expenditures declined by 11.1 percent.

In relation to the population in Ontario, General Assistance beneficiaries constituted an average 1.8 percent in September 1982. This ranged from a low of 0.5 percent in York, Rainy River, Middlesex and Halton to a high of 4.0 percent in Windsor and 3.5 percent in Cornwall.

Family Benefits

Family Benefits data cover the same units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in September 1982 was 123,728 or 3.2 percent higher than in September 1981. More specifically, there was a noticeable decline among recipients covered by the Guaranteed Annual Income System (GAINS), the largest being among couples (22.4 percent) and family with children (10.7 percent). However, the category without GAINS showed a moderate increase - 4.2 and 7.9 percent among families with children and singles respectively, and a substantial increase (24.4 percent) among couples.

Twelve-months cumulative expenditures ending September 1982 amounted to \$547.6 million or 17.8 percent more than the previous 12 months ending September 1981.

The overall average of beneficiaries as a percentage of population in Ontario was 2.7 percent in September 1982. This ranged from a low of 1.0 percent in Halton, Peel and York to a high of 7.1 percent in Nipissing (excluding North Bay) and 6.7 percent in Manitoulin. In the largest administrative units, Toronto, at 2.5 percent, and Ottawa-Carleton, at 2.3 percent, were slightly below the provincial average, while Hamilton-Wentworth, at 3.8 percent, was well above.

The combination of Family Benefits and General Welfare Assistance beneficiaries as a percentage of population in Ontario refers only to the 54 largest units covered in the General Assistance Section. In September 1982, the overall average was 4.5 percent, ranging from a low of 1.5 percent in Halton to a high of 10.6 percent in Nipissing (excluding North Bay).

Child Welfare

In September 1982, the children in care numbered 11,676 or 5.9 percent less than in September 1981. Children under protection and prevention services declined by 4.0 percent, while children under supervised adoption probation decreased by 27.7 percent.

Distribution of children by wardship showed declines of 10.9 percent in society wards and 6.6 percent in crown wards. Non-wards, however, reported a negligible (0.2 percent) increase in children.

A breakdown of the 51 societies showed an average 0.5 percent of children in care of the estimated population under the age of 18. The Northern Region, at 0.8 percent, was above the provincial average; the Southwestern Region, at 0.4 percent, was slightly below, and the Central and Southeastern Regions, both at 0.5 percent, were at the provincial average.

When protection and other community services were included, the beneficiaries as a percentage of total estimated population ranged from a low of 0.2 percent in York and Durham to a high of 2.5 percent in Kenora. The overall average was 0.6 percent.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act covers people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

NOTES

The Child Welfare Act is administered by the 51 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts, with an exception of Cochrane where two Societies - the Kapuskasing C.A.S. and the Porcupine C.A.S. serve the District. The other exceptions are Essex, Hamilton and Toronto. The first two have second Societies which are Catholic, while in Toronto there is also the Jewish Family and Child Services.

Starting with the January-March 1982 Bulletin, Child Welfare data are extracted from the reports provided by the C.A.S. Quarterly Reporting System (Q.R.S.) and the Adoption Log. They replaced C.A.S. Monthly Statistical Report (M.S.R.) in a somewhat revamped form, yet providing a good basis for comparison of trends.

At present, only six tables are provided in this Bulletin. They reflect the format and content of the previously published data in Tables 27, 29, 31, 33, 34 and 35. Replacements for tables 28, 30 and 32 are not yet available, but will be included in the Bulletin in the future.

All tables are subject to later corrections and adjustments, and should be read as approximations which give general indications of volumes and trends. It should be noted that data in Table 27 have been updated, providing more accurate totals than those published in previous issues.

General Assistance

General Assistance data provided in the Bulletin cover municipalities with population in excess of 20,000 and all county and district administration boards. Together, they account for about 86 percent of the total caseload in Ontario.

The caseload in December 1982 was 97,995 or 34.8 percent higher than in December 1981. The largest increases were reported in the employable category, showing 60.1 percent for male headed family units, 64.9 percent for single females, 86.5 percent for single males and 110.1 percent for female headed family units. In the unemployable category, there was 26.1 percent decline among female headed family units and a moderate increase (5.5 to 13.4 percent) among other groups.

Twelve-months cumulative expenditures ending December 1982 amounted to \$287.7 million or 32.7 percent more than the previous twelve months ending December 1981.

The breakdown by the Ministry's four regional offices showed increases in quarterly averages of beneficiaries in all regions, ranging from 23.5 percent in the Southeastern Region to 38.7 percent in the Central Region. The overall increase in beneficiaries was 31.8 percent. The expenditures, however, showed much higher increases in all regions, the largest (53.7 percent) being in the Central Region and the lowest (39.7 percent) in the Southeastern Region. Total quarterly expenditures increased by 26.5 percent.

Supplementary Aid showed an overall decline of 51.3 percent in quarterly averages of beneficiaries. However, the regional breakdown reported a 21.8 percent increase in the Southeastern Region; and declines of 38.6 percent in the Northern Region, 69.5 percent in the Southwestern and 70.4 percent in the Central Region. Total quarterly expenditures declined by 26.5 percent.

Quarterly averages of beneficiaries under the Special Assistance program showed an overall increase of 5.1 percent. However, the percentage changes by regions varied widely. The Central and Southeastern Regions reported increases of 12.5 and 9.8 percent respectively; while the Northern Region showed 1.7 percent and the Southwestern Region 15.6 percent decline. Total quarterly expenditures increased by 13.1 percent.

In relation to the population in Ontario, General Assistance beneficiaries constituted an average 2.2 percent in December 1982. This ranged from a low of 0.6 percent in Halton to a high of 4.6 percent in Windsor.

Family Benefits

Family Benefits statistics cover the same units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in December 1982 was 125,956 or 5.7 percent higher than in December 1981. More specifically, there was a substantial increase among recipients covered under the Guaranteed Annual Income System (GAINS), ranging from 113.9 percent for singles to 207.8 percent for couples without children. This was at the expense of the category without GAINS, which showed declines of 76.8 percent for singles and 83.1 for couples without children.

Twelve-months cumulative expenditures ending December 1982 amounted to \$561.3 million or 14.7 percent more than the previous 12 months ending December 1981.

The overall average of beneficiaries as a percentage of population in Ontario was 2.7 percent in December 1982. This ranged from a low of 1.0 percent in Halton, Peel and York to a high of 7.1 percent in Nipissing (excluding North Bay) and 6.6 percent in Manitoulin. In the largest administrative units, Toronto, at 2.6 percent, and Ottawa-Carleton, at 2.3 percent, were slightly below the provincial average, while Hamilton-Wentworth, at 3.9 percent, was well above.

The combination of Family Benefits and General Welfare Assistance beneficiaries as a percentage of population in Ontario refers only to the 54 largest units covered in the General Assistance Section. In December 1982, the overall average was 5.1 percent, ranging from a low of 1.6 percent in Halton to a high of 11.4 percent in Nipissing (excluding North Bay).

Child Welfare

In December 1982, the children in care numbered 11,417 or 5.4 percent less than in December 1981, while children under protection and prevention services increased by 1.4 percent.

Distribution of children by wardship showed declines of 8.9 and 8.8 percent in crown wards and society wards respectively; while children in non-wards increased by 2.5 percent.

A breakdown for the 51 societies showed an average 0.5 percent of children in care of the estimated population under the age of 18. The Northern Region, at 0.7 percent, was above the provincial average; the Southwestern Region, at 0.4 percent, was slightly below, and the Central and Southeastern Regions, both at 0.5 percent, were at the provincial average.

When protection and prevention services on children were included, the beneficiaries as a percentage of total estimated population ranged from a low of 0.2 percent in York to a high of 2.1 percent in Kenora. The overall average was 0.6 percent.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act covers people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

NOTES:

The Child Welfare Act is administered by the 51 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts, with an exception of Cochrane where two Societies - the Kapuskasing C.A.S. and the Porcupine C.A.S. serve the District. The other exceptions are Essex, Hamilton and Toronto. The first two have second Societies which are Catholic, while in Toronto there is also the Jewish Family and Child Services.

Starting with the January-March 1982 Bulletin, Child Welfare data are extracted from the reports provided by the C.A.S. Quarterly Reporting System (Q.R.S.). They replaced C.A.S. Monthly Statistical Report (M.S.R.) in a somewhat revamped form, yet providing a good basis for comparison of trends.

At present, only six tables are provided in this Bulletin. They reflect the format and content of the previously published data in Tables 27, 29, 31, 33, 34 and 35. Replacements for tables 28, 30 and 32 are not yet available, but will be included in the Bulletin in the future.

All tables are subject to later corrections and adjustments, and should be read as approximations which give general indications of volumes and trends.

TABLE 27. CHILD WELFARE CASES, DEC 1981 - DEC 1982

YEAR/MONTH AS AT	TOTAL CHILDREN IN CARE		PROTECTION AND PREVENTION		TOTAL * BENEFICIARIES
	#		CASES	CHILDREN	#

SOURCE: Total children in care and protection and prevention - from the CAS Quarterly Reporting System (Q.R.S.); Estimated population-from Municipal Directory, Ministry of Inter-governmental Affairs adjusted for Indian Bands and Unorganized Territories.

* Includes total children in care and children under protection and prevention.

** Method for calculating population distributions for:

- a) Essex and Hamilton - Wentworth - regular CAS = 60%
- Catholic CAS = 40%

- b) Metro Toronto - regular CAS = 54%
- Catholic CAS = 42%
- Jewish F. & C.S. = 4%

- c) Cochrane - Kapuskasing CAS = 42.3%
- Porcupine CAS = 57.7%
